

Project Hydrogeologist – Emeryville, CA

We are seeking a **Project Hydrogeologist** to lead, manage, and contribute to technically challenging environmental projects in northern California. The position will be based in our Emeryville office and may require travel to project sites throughout northern California.

Qualifications:

- BS degree in hydrogeology, geology, or engineering
- Minimum 10 years' experience working on environmental remediation sites, primarily in environmental hydrogeology
- Knowledge of state and federal environmental regulations
- Experience in site redevelopment
- Strong communication, interpersonal, computer, and quantitative skills
- Ability to lead multidisciplinary teams
- Experience in supervising and mentoring technical staff
- California professional registration
- A California driver's license and a DMV record acceptable to Weiss's insurance carrier

Additional experience in water resources and technical issues pertaining to groundwater basin management is a plus.

Responsibilities:

- Developing and executing all aspects of project management including, but not limited to, scopes of work within specified schedules and budgets
- Interacting with clients and regulatory agency staff
- Participating in business development activities and preparing proposals
- Preparing, editing, and reviewing projects, work plans, and reports
- Leading teams engaged in:
 - Field sampling and hydraulic testing
 - Characterizing contaminants in soil and groundwater
 - Defining alluvial and bedrock stratigraphy, geology, and hydrogeology; natural groundwater chemistry and geochemical processes; and, generating and interpreting geologic and hydrogeologic cross-sections
 - Developing groundwater elevation and contaminant plume maps.
- Developing hydrogeologic conceptual models
- Developing hydraulic test designs, instrumentation, and analysis
- Designing and installing wells
- Conducting numerical and analytical groundwater, and vadose zone flow and transport modeling
